Catalog CORRECTIONS & CLARIFICATIONS newest are in box

NOTE BACKORDERS below \$50.00 will no longer be held due to higher UPS charges...Please reorder as necessary. **Minimum charge is now \$10.00.**

Page 8 Picture #22-EC735CK should read 22-73513

Page 8 #10-075E Wilwood Brake Kit [moves wheels out 13/16"] **Must be used with:** 10-060A1S, 10-061A1S Narrowed A Arms & 10-064A1 to 4 Coilovers or wheels will stick out too far.

Page 8 #22-EC735-1LS & 2LS include 10-075A1 spindles. Booster specified is 22-232DSS3 level mount. There are other options such as regular yellow zinc plated booster, angle mount booster etc. These Kits with the older big Chevelle calipers work great and are probably at least equal to aftermarket multi-piston calipers. The improvement here is from the rotor size increase. Price wise these kits are a great value, **check it out for yourself and compare what you are getting for the money!** See additional information in the NEW PARTS SECTION.

Page 18 10-067A, AS, include 31 spline axles w/ 4-3/4 Chevy bolt pattern, specify track width of 60" [stock] or narrower 58" [recommended].

Page 32 #11-10056A is now assembled and includes fender mount brackets

Page 33 #11-5589AL, & AR are 55 sedan only. See New Parts Section below for 56-7 sedan.

Page 37 #11-15993 fits all 55-7 2 dr HT as well as convertibles. #11-15993AF fits everything else all Sedans & 4 dr HT.

Page 53 #12-061 picture should read 12-060.

Page 84 #18-162 is also used on 2dr Wagons as Quarter Window Bottom Stop.

Page 66 #15-115B is 56-7 not 55. This part has angled type bell housing bar attached so if used on a 55 the stock Z bar would be too short to reach it. To use on a 55 you would have to use a large ball #15-113 on the frame bracket, if original cut off welded ball & tap for 15-113 or replace frame bracket with 56-7 #15-111 and use #15-124 57 Z bar with #15-100 and #15-101.

Page 87 Heading 2nd column top of page should read Rear Glass Sedan Not 2dr HT. Individual listings are correct.

Page 108 #20-234A is 1-1/4" wide not 1-1/8 as listed. clip is used on 57 B/A & 210 4 dr rear door long side molding rear end clip where molding is wider.

Page 203 Lokar Shifters; Case mounts are a tight fit to floor hump. Cable operated Floor Shifters are the most versatile.

Page 208 Bottom of first column Original Length Small Driven Gears [for speedo cable into trans] are for 55-60 Powerglide & Manual Trans, '61-up' at end of second line is a misprint.

Page 211 Gauge Set Note. Gauge sets DO NOT INCLUDE CLUSTER BEZELS. Gauge Sets include gauges senders and mounting panel as noted only.
